

Package ‘QuadRoot’

September 10, 2021

Type Package

Title Quadratic Root for any Quadratic Equation

Version 0.2.0

Author Pankaj Das

Maintainer Pankaj Das <pankaj.das2@icar.gov.in>

Description It will assist the user to find simple quadratic roots from any quadratic equation.

QuadRoot	<i>Quadratic Root for any Quadratic Equation</i>
----------	--

Description

It is used to find simple quadratic roots from any quadratic equation. This package follows the Sridharacharya method to solve a quadratic equation.

Usage

```
QuadRoot(inputdata)
```

Arguments

inputdata coefficient vector of quadratic equation

Value

It returns quadratic roots of the equation

Author(s)

Pankaj Das

Examples

```
dataset=c(2,5,-3)  
QuadRoot(dataset)
```
