R topics documented:

`map_DEP`   *Geographic information of the departments of Peru*

Description

Geographic information of the departments of Peru

Usage

`map_DEP`

Format

dataframe

COD_DEPARTAMENTO chr Department code

DEPARTAMENTO chr Department name

coords_x dbl Longitude of the centroid of the department

coords_y dbl Latitude of the centroid of the department

geometry MULTIPOLYGON Geometric object

`map_DIST`   *Geographic information of the districts of Peru*

Description

Geographic information of the districts of Peru

Usage

`map_DIST`

Format

dataframe

COD_REGION chr Region code

COD_DEPARTAMENTO chr Department code

COD_PROVINCIA chr Province code

COD_DISTRITO chr District code

REGION chr Region name

DEPARTAMENTO chr Department name

PROVINCIA chr Province name

DISTRITO chr District name

coords_x dbl Longitude of the centroid of the district

coords_y dbl Latitude of the centroid of the district

geometry MULTIPOLYGON Geometric object

---

map_PROV   *Geographic information of the provinces of Peru*

Description

Geographic information of the provinces of Peru

Usage

    map_PROV

Format

dataframe

COD_REGION chr Region code

COD_DEPARTAMENTO chr Department code

COD_PROVINCIA chr Province code

REGION chr Region name

DEPARTAMENTO chr Department name

PROVINCIA chr Province name

coords_x dbl Longitude of the centroid of the province

coords_y dbl Latitude of the centroid of the province

geometry MULTIPOLYGON Geometric object

---

map_REG   *Geographic information of the regions of Peru*

Description

Geographic information of the regions of Peru

Usage

    map_REG

Format

dataframe

COD_REGION chr Region code

REGION chr Region name

coords_x dbl Longitude of the centroid of the region

coords_y dbl Latitude of the centroid of the region

geometry MULTIPOLYGON Geometric object
