

RcppResultSet::add

```
graph LR; A[RcppResultSet::add] --> B[RcppFrame::getColNames]; A --> C[RcppFrame::getTableData];
```

The diagram illustrates a function call from `RcppResultSet::add` to two methods of the `RcppFrame` class. The source function is represented by a grey box on the left, while the target methods are in white boxes on the right. Two blue arrows originate from the right side of the `RcppResultSet::add` box and point to the left side of the `RcppFrame::getColNames` and `RcppFrame::getTableData` boxes, indicating the flow of control or data.

RcppFrame::getColNames

RcppFrame::getTableData
